

# RStudio + Git =

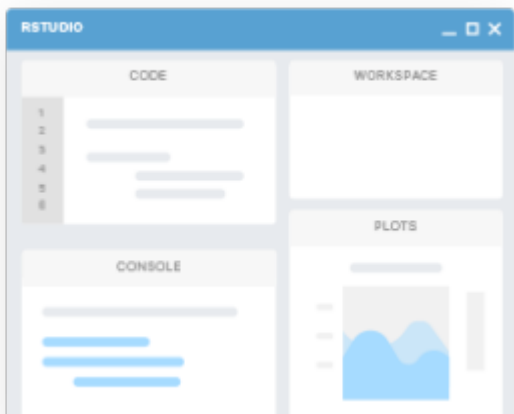

[jeroen.staab@posteo.de](mailto:jeroen.staab@posteo.de)

9.3.2017

# R Studio?

- *Integrated development environment (IDE)*  
-> Editor, Console, Plots, Versioning and more
- *R* is a widely spread data science language
- *RStudio* is developed from useRs for useRs
- It's free and open source ♥

Visit [RStudio.com](https://www.rstudio.com)

Latest Version  
1.0.136

-> Check for Updates

# Pane Layout (left)!

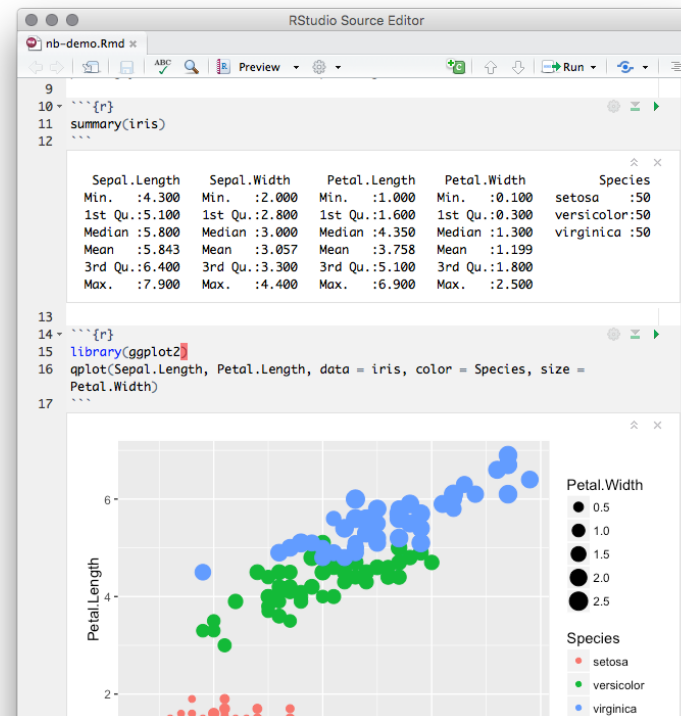

## Editor

- Show code in new window
  - Jump to function (F2)
  - File navigation
  - Multicursor
- Document inside code
  - Save results as .html / .pdf
  - Gallery view plots

## Console

Execute commands

- Print output - Command history

# Pane Layout (right)!

## Enviroment, History

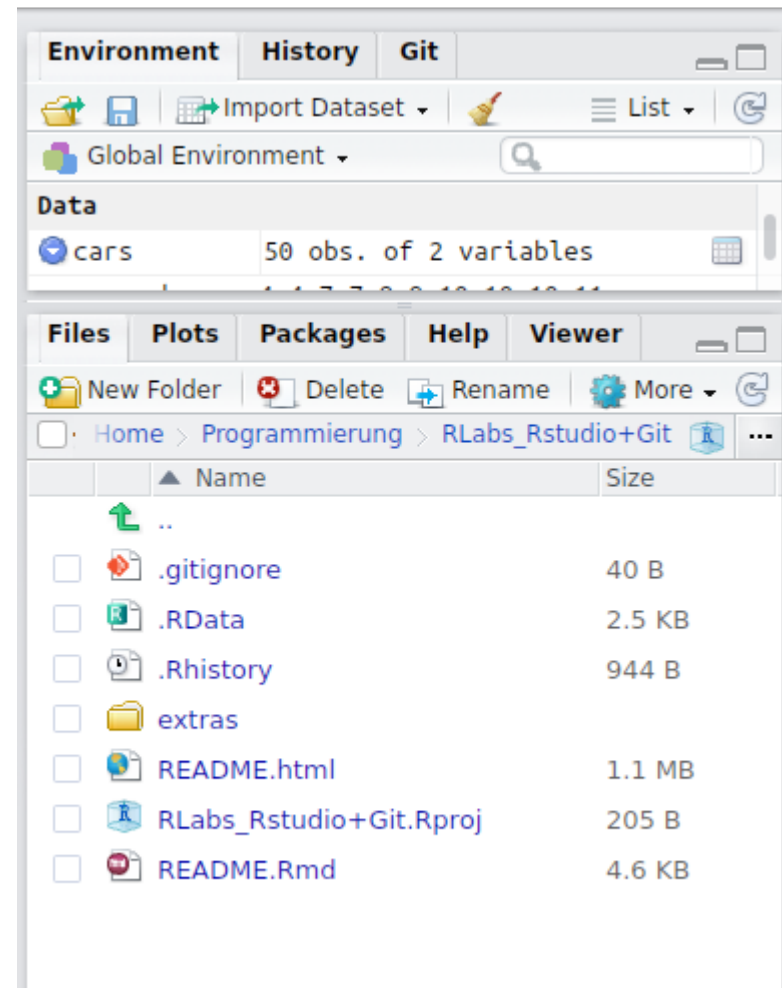

- Additional Panes

## Files

- Browse files / rename
- `setwd()` [MORE]
- open native file browser [...]

## Packages

- `library()` / `detach()`
- `install.packages()`

# Keyboard Shortcuts 1!

## Multicursor

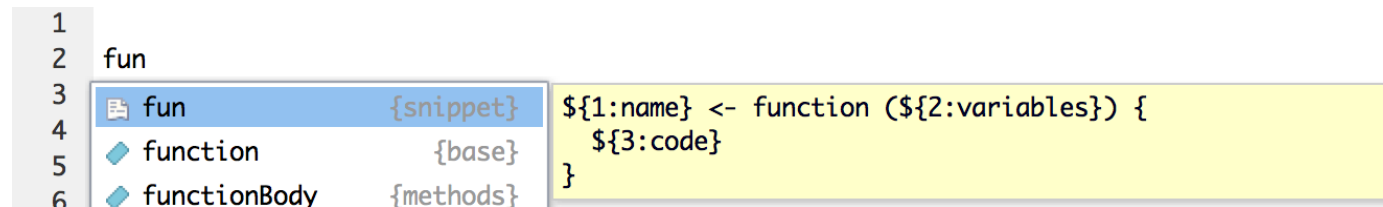

Select multiple lines/positions for parallel editing

- with Mouse: CTRL+ALT+Click
- keyboard: CTRL+ALT+UP/DOWN
- rename variable: Select it and CTRL+ALT+K

## Code snippets

Text macros that are used for quickly inserting common snippets of code ([see Blog](#)). - Try fun, lib, apply, ...

- Type fun and press TAB for shifting through arguments

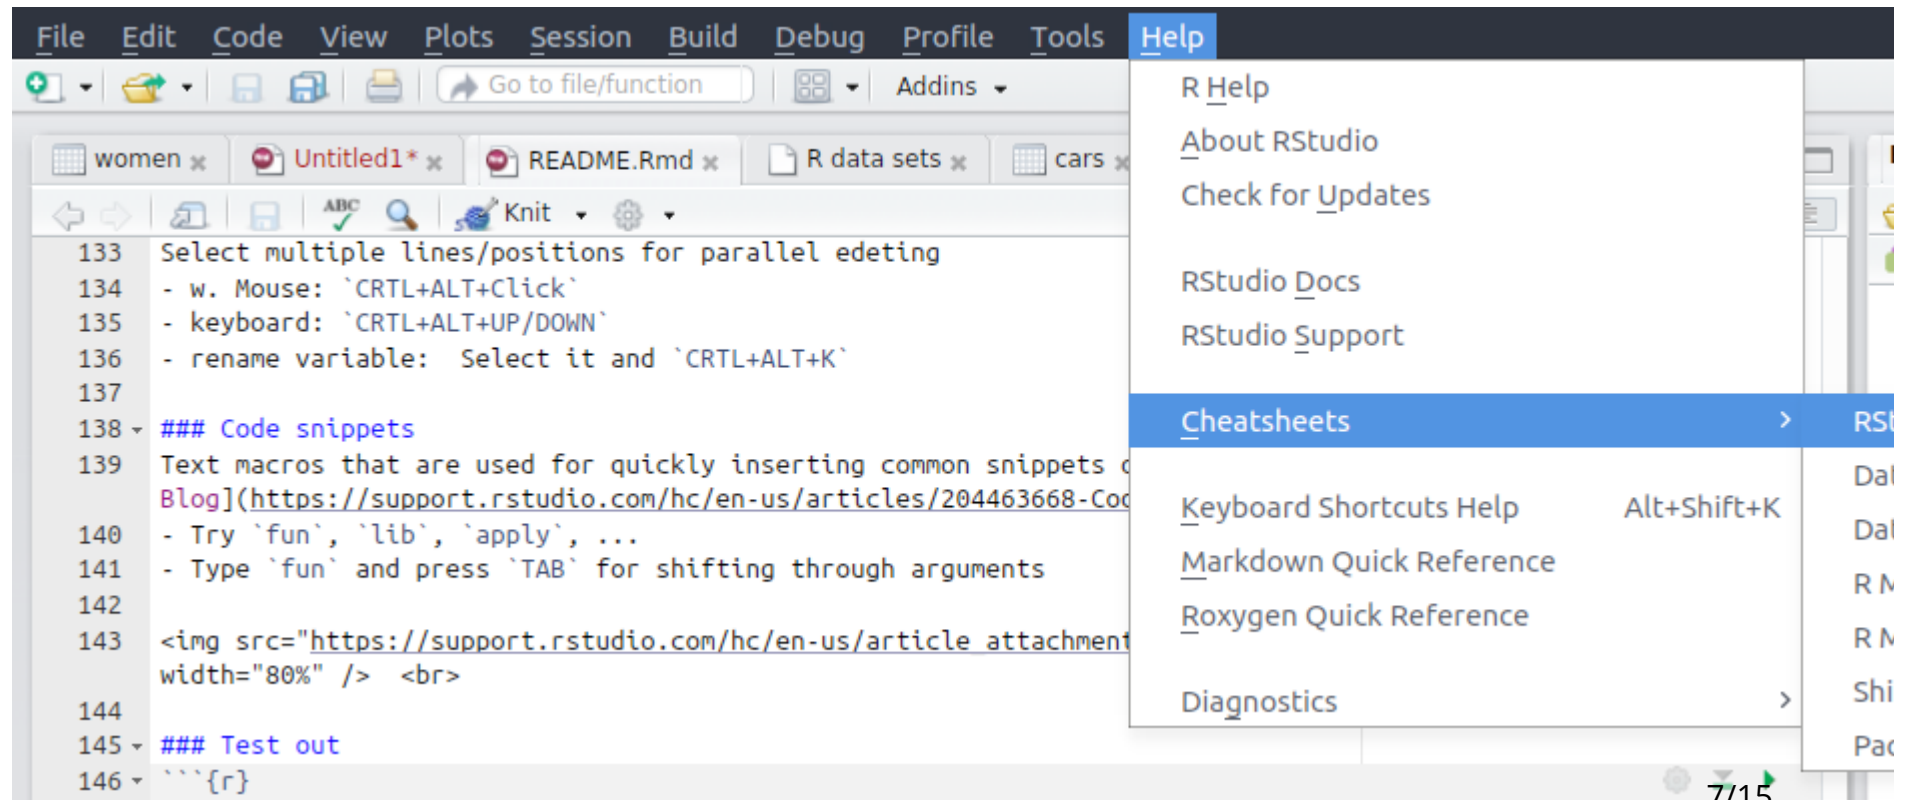

# Keyboard Shortcuts 2!

Press SHIFT+ALT+K for "all" shortcuts:

Keyboard Shortcut Quick Reference					
Tabs		Source Navigation		Source Edit	
Ctrl+Shift+.	Switch to Tab...	Ctrl+F9	Back	Ctrl+Alt+I	Ins
Ctrl+Tab	Next Tab	Ctrl+F10	Forward	Ctrl+Shift+R	Ins
Ctrl+Shift+Tab	Previous Tab	Ctrl+Alt+U	Find Usages	Ctrl+Alt+X	Ex
Ctrl+Shift+F11	First Tab	Ctrl+F3	Use Selection for Find	Ctrl+Alt+V	Ex
Ctrl+Shift+F12	Last Tab	Ctrl+F	Find...	Ctrl+Shift+C	Co
Panels		Ctrl+G	Find Next	Ctrl+I	Re
Ctrl+1	Move Focus to Source	Ctrl+Shift+G	Find Previous	Ctrl+Shift+/	Re
Ctrl+2	Move Focus to Console	Ctrl+Shift+J	Replace and Find	Ctrl+Shift+A	Re
Ctrl+3	Move Focus to Help	Ctrl+.	Go To File/Function...	Ctrl+Shift+Alt+D	Sh
Ctrl+4	Show History	Shift+Alt+G	Go to Line...	Alt+L	Co
Ctrl+5	Show Files	Shift+Alt+J	Jump To...	Shift+Alt+L	Ex
Ctrl+6	Show Plots	Ctrl+P	Jump To Matching	Alt+O	Co
Ctrl+7	Show Packages	Ctrl+Shift+Alt+E	Expand To Matching	Shift+Alt+O	Ex
Ctrl+8	Show Environment	Ctrl+Shift+O	Show Document Outline	Alt+Up	Mo
Ctrl+9	Show Viewer	Ctrl+Shift+Up	Expand Selection	Alt+Down	Mo
Ctrl+F1	Show Vcs	Ctrl+Shift+Down	Shrink Selection	Ctrl+D	De
Ctrl+F2	Show Build	Ctrl+PgDn	Go to Next Section	Ctrl+U	Yar
		Ctrl+PgUp	Go to Previous Section	Ctrl+K	Yar
		Ctrl+Alt+A	Split Into Lines	Ctrl+Y	Ins

# Cheatsheets!

Open cheat sheets for ggplot2, markdown, and more directly from the menu bar.

# Addins

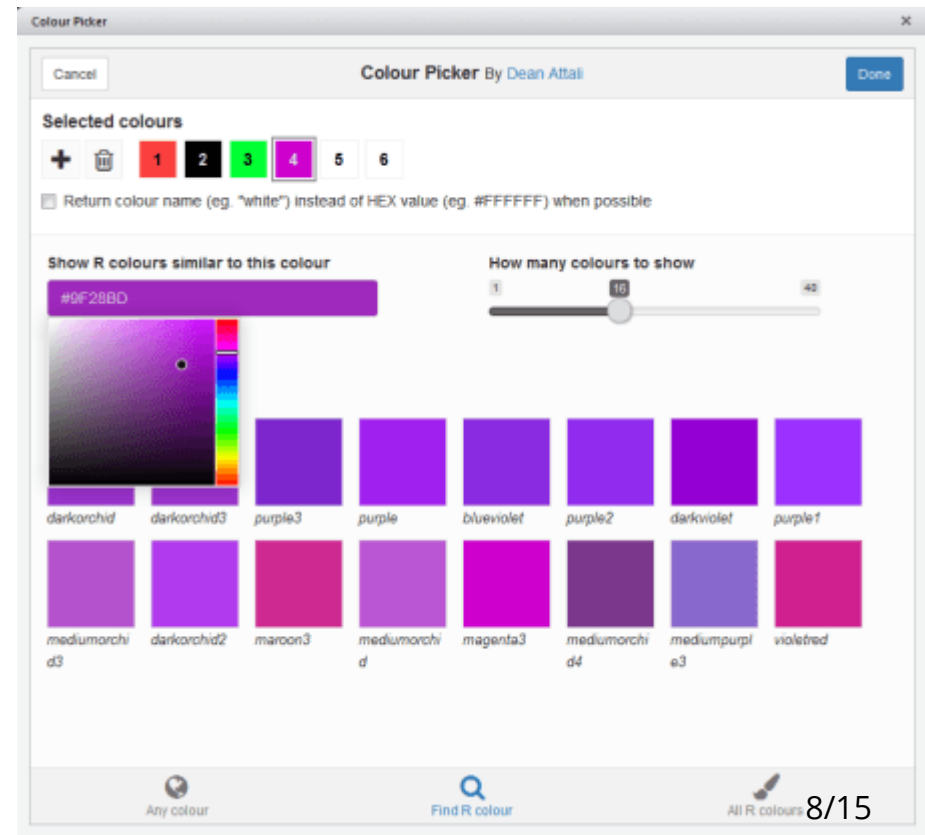

How to install RStudio Addins?

```
# install.packages("addinslist")  
addinslist::addinslistAddin()
```

## Example Color Picker

- Browse Addins
- Install colourpicker
- Click Addins > Colour picker
- Returns a vector  
`c("red", "black",  
"green", "purple")`

see also `colorHelper()`

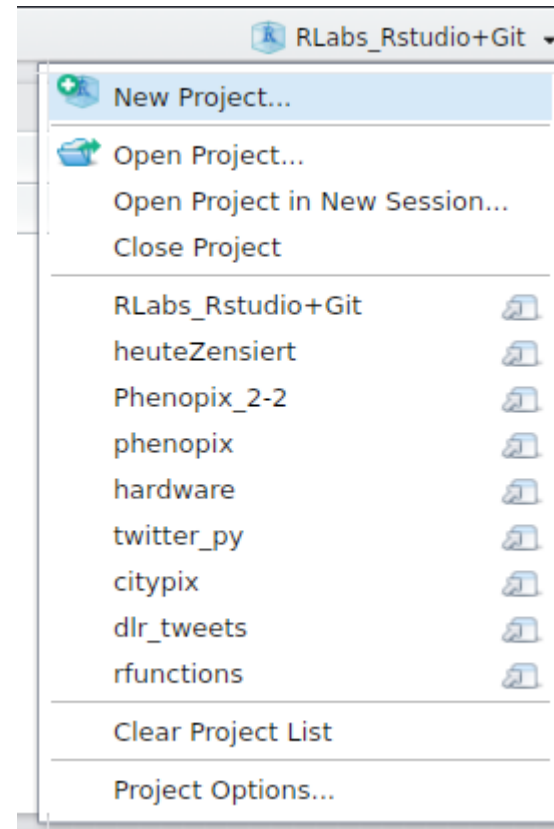

# Projects

You already organize your files in folders.

Why not add an extra file organizing your R sessions?

## Project file .Rproj

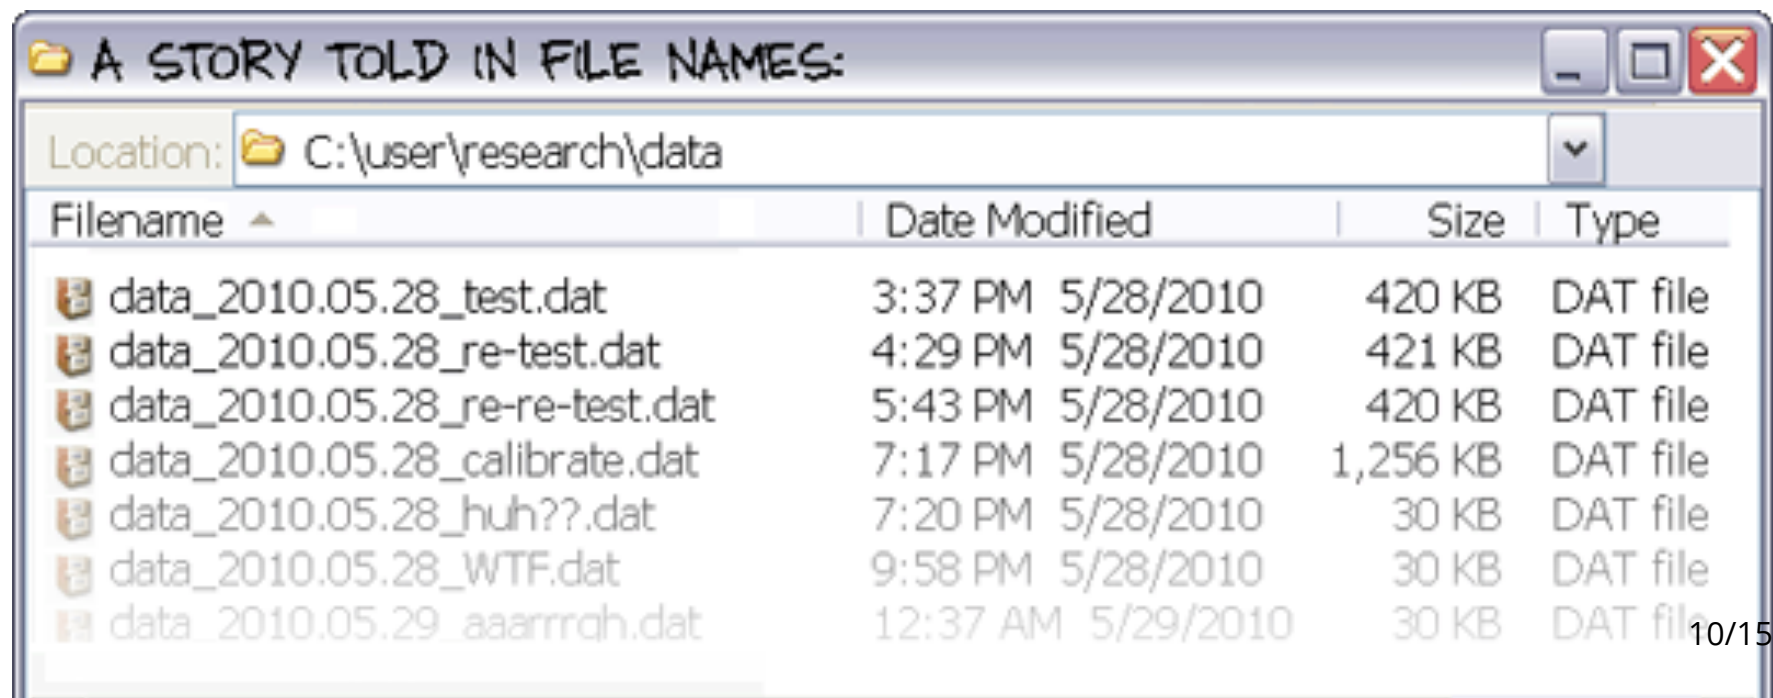

- Automatically `setwd()`
- Load .Rdata environment
- Load .Rhistory
- Easily switch between projects
- Build packages
- Versioning with `git`

# Versioning

edit -> save as

File name includes date and message

# Versioning with Git

edit -> save -> stage -> commit

Commit includes date and message

Versioning tools like git keeps track of file changes

## Organize Commits

## RStudio Implementation

RStudio: Review Changes		
Changes		History
master		(all commits)
Subject	Author	
HEAD -> refs/heads/master	Minor improvements	Jeroen
	Mention SVN as emailed with Christian B.	Jeroen
	Adding reindent code CTRL+I	Jeroen
	Slides with ! are live demons in rstudio	Jeroen
	minor impro	Jeroen
	Typo	Jeroen
	initial commit	Jeroen

# Configure Git

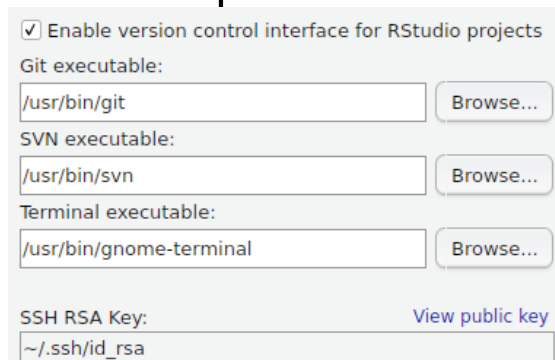

Install git on your computer

- Visit [git-scm.com](https://git-scm.com)

RStudio

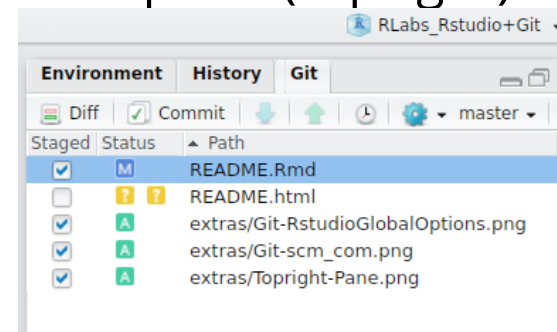

- Global options

- Project options

- New pane (topright)

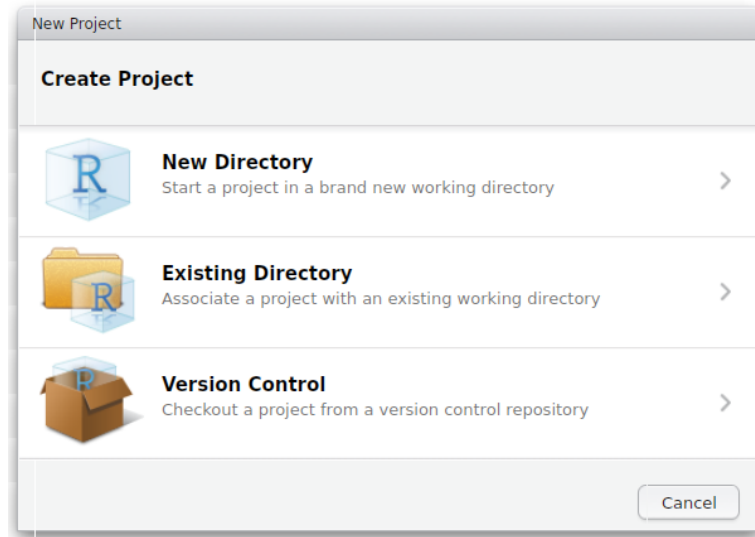

- Interact w. cloud (opt-in)  
e.g. Github / Bitbucket

# Getting Started

## New Project

Menu > File > New Project

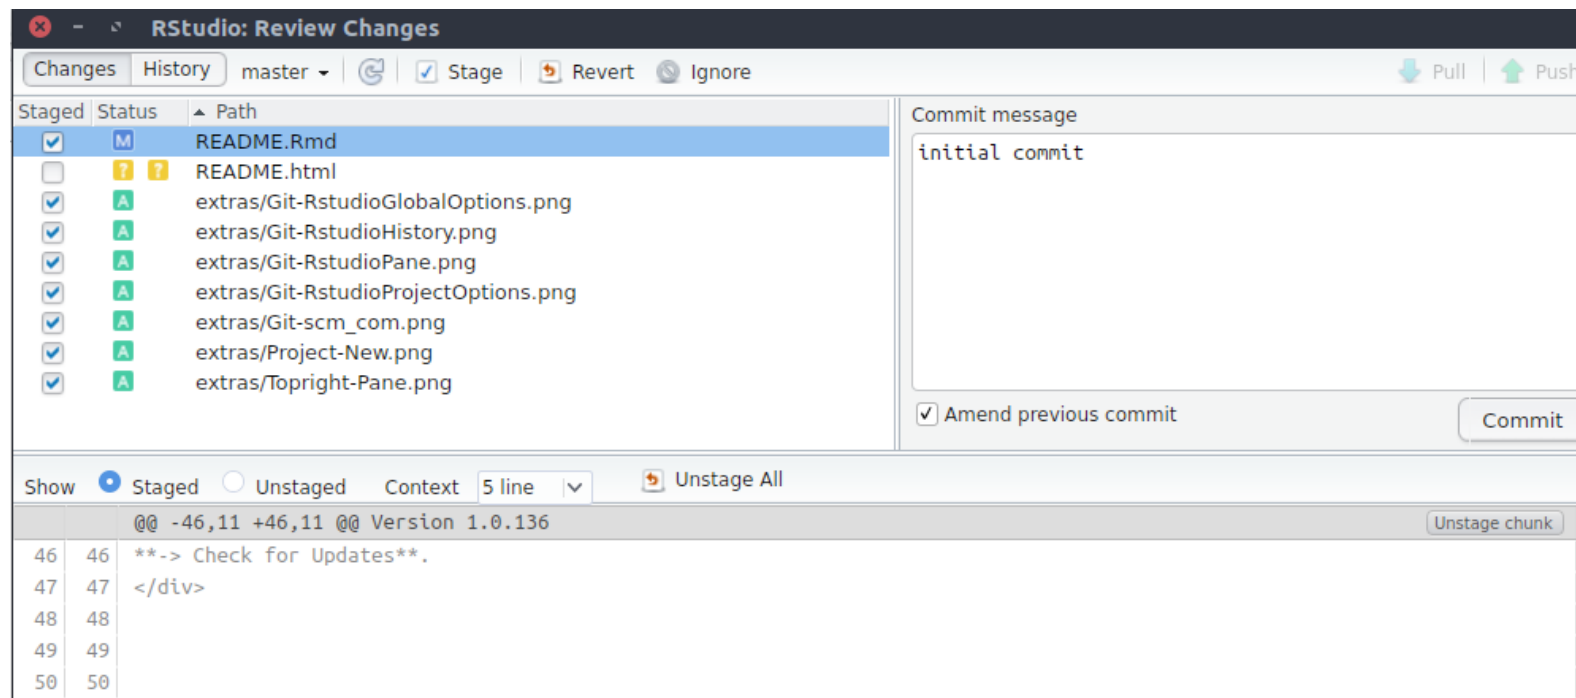

## Existing Directory

- Open directory in terminal.
- Type `git init`
- Restart RStudio.

Troubleshoot:  
Check project options.

# Workflow

- Stage: Select file for next commit. Freezes state.
- Commit: Create new node in time line. Add a message.
- Push & pull: Interact with remote repository.
